INTRODUCTION

Heedplay Gaming is a pioneering gaming company founded by a team of gaming and crypto enthusiasts with years of experience in these fields; passionate about taking the gaming industry to the next level by unleashing the tremendous potential of blockchain upon it. What sets HPG Gaming apart? Our richly designed games are set in galaxies and dimensions far from our own, with unique in-game assets our players can actually own. The decentralized Dark Metaverse empowers players and entitles them to in-game revenue. Alongside our talented team of in-software house designers, developers, and specialists, HPG Gaming is partnering with some of the world's best gaming studios to execute a truly state-of-the-art yet accessible experience for gamers around the world.

Our Mission:

To bridge the gap between gaming and blockchain, giving players the ability to earn while playing.

OVERVIEW OF THE HEED PLAY SYSTEM

Build-in Hardware and cold wallet and individual unique admin panel of staking for each customer. Heed Play network protocol (blockchain) with a process of managing smart contracts that will be the custodians of the client's tasks and administrative access conditions. Third parties don't have access to smart contracts, including reserve pools that provide and support all investments and traded assets. Productive portfolio defining investment transactions for smart contracts. The volume of the assets in stake storage, while the company's conversion income data are recorded in blockchain, generating stake profit for customers.

Trading platform and integration as an investment and trade coin. Listing on major Trading platforms and reproducing of a wide range of trade solutions to meet all your investment and trade needs.

SOLUTION

The creators of some cryptocurrencies decided to link their value to more stable assets that have already been established in the market for many years. The very idea of such a binding arose back in 2012, when the cryptosphere was not so popular. But the first practical implementation of this idea had to wait almost 6 years. Only in 2015, the first stablecoin called Tether was born. Its rate was pegged to the value of the dollar in a ratio of 1:1, and the coin received the ticker USDT.

Sometimes Tether went a little ahead and cost 1.05 USD per coin, and sometimes it sank to 0.92 dollars. But this happened during periods of serious turmoil in the crypto market, when traditional assets soared and fell just as sharply. But the USDT remained virtually untouched. It is because of its stability that the new class of currencies is called stablecoin (that is, stable coin). The appearance of Tether set off a chain reaction.

In the cryptocurrency market, stablecoins serve as a buffer. Through them, the owners of large capital can enter the crypto market to turn a large amount of money into money inside the blockchain at once and trade on them or invest.

Our stablecoin HPG is tied to the rate of Busd and (approximate cost of \$ = 0.10). Only minor fluctuations in the exchange rate that the cryptocurrency market can produce are allowed.

The smart contract of the HPG token contains the necessary algorithms to maintain the cryptocurrency exchange rate. The main guarantor is the exchanges, which regulate the exchange rate by the percentage ratio of buy/sell. In addition, the guarantor is our daughter project and mutual settlements on it. The HPG token is written on the BSC blockchain and complies with the BSC standard. The token code is open for reading and analysis.

THE HEED PLAY DAPP ECOSYSTEM

1. HEEDPLAY

HPG would own or contain a decentralized exchange, which makes use of an automated market maker (AMM) that allows digital assets to be traded without permission and automatically by using liquidity pools instead of a traditional market of buyers and sellers. It is a type of decentralized exchange (DEX) that relies on a mathematical formula to price assets. Instead of using an order book like a traditional exchange, assets are priced according to a pricing algorithm.

2. Non-Fungible Tokens (NFTs) on HPH wallet

Non-fungible tokens (NFTs), which are exclusive collectible cryptocurrency assets, already existed in 2012 when the concept of colorful Bitcoin coins first emerged. These coins were simply satoshis – small fractions of a bitcoin – marked or “colored” with distinct information that could link the coins to real-world assets.

WORK OF ART

Virtual items in video games, such as skins, virtual currency, weapons, and avatars

MUSIC

Collectibles (for example, digital business cards)

Tokenized real-world assets, from real estate and cars to racehorses and designer sneakers; Virtual land

Video footage of iconic sporting moments. socialmedia will also offer an op on to participate in the exchange of collectibles on the platform. We will have a section for non-fungible tokens (NFT) that users can trade for HPG. Early presale adopters will collect NFTs for free once there is a minimum purchase of 100\$ BUSD worth of HPG

HEED PLAY
BLOCKCHAIN GAMING INDUSTRY

NFTs have become one of the hottest cryptocurrency trends of 2021, with global sales of up to **55% since**

2020, rising from million to **\$389 Million.**

NFTs can be used to represent virtually any type of real or intangible item, including:

UNIQUE SOCIALMEDIA SYSTEM

We are world's first social media based decentralized platform. The social media team aimed at delivering on it's promises as guided by it's unique roadmap through the development of it's platforms

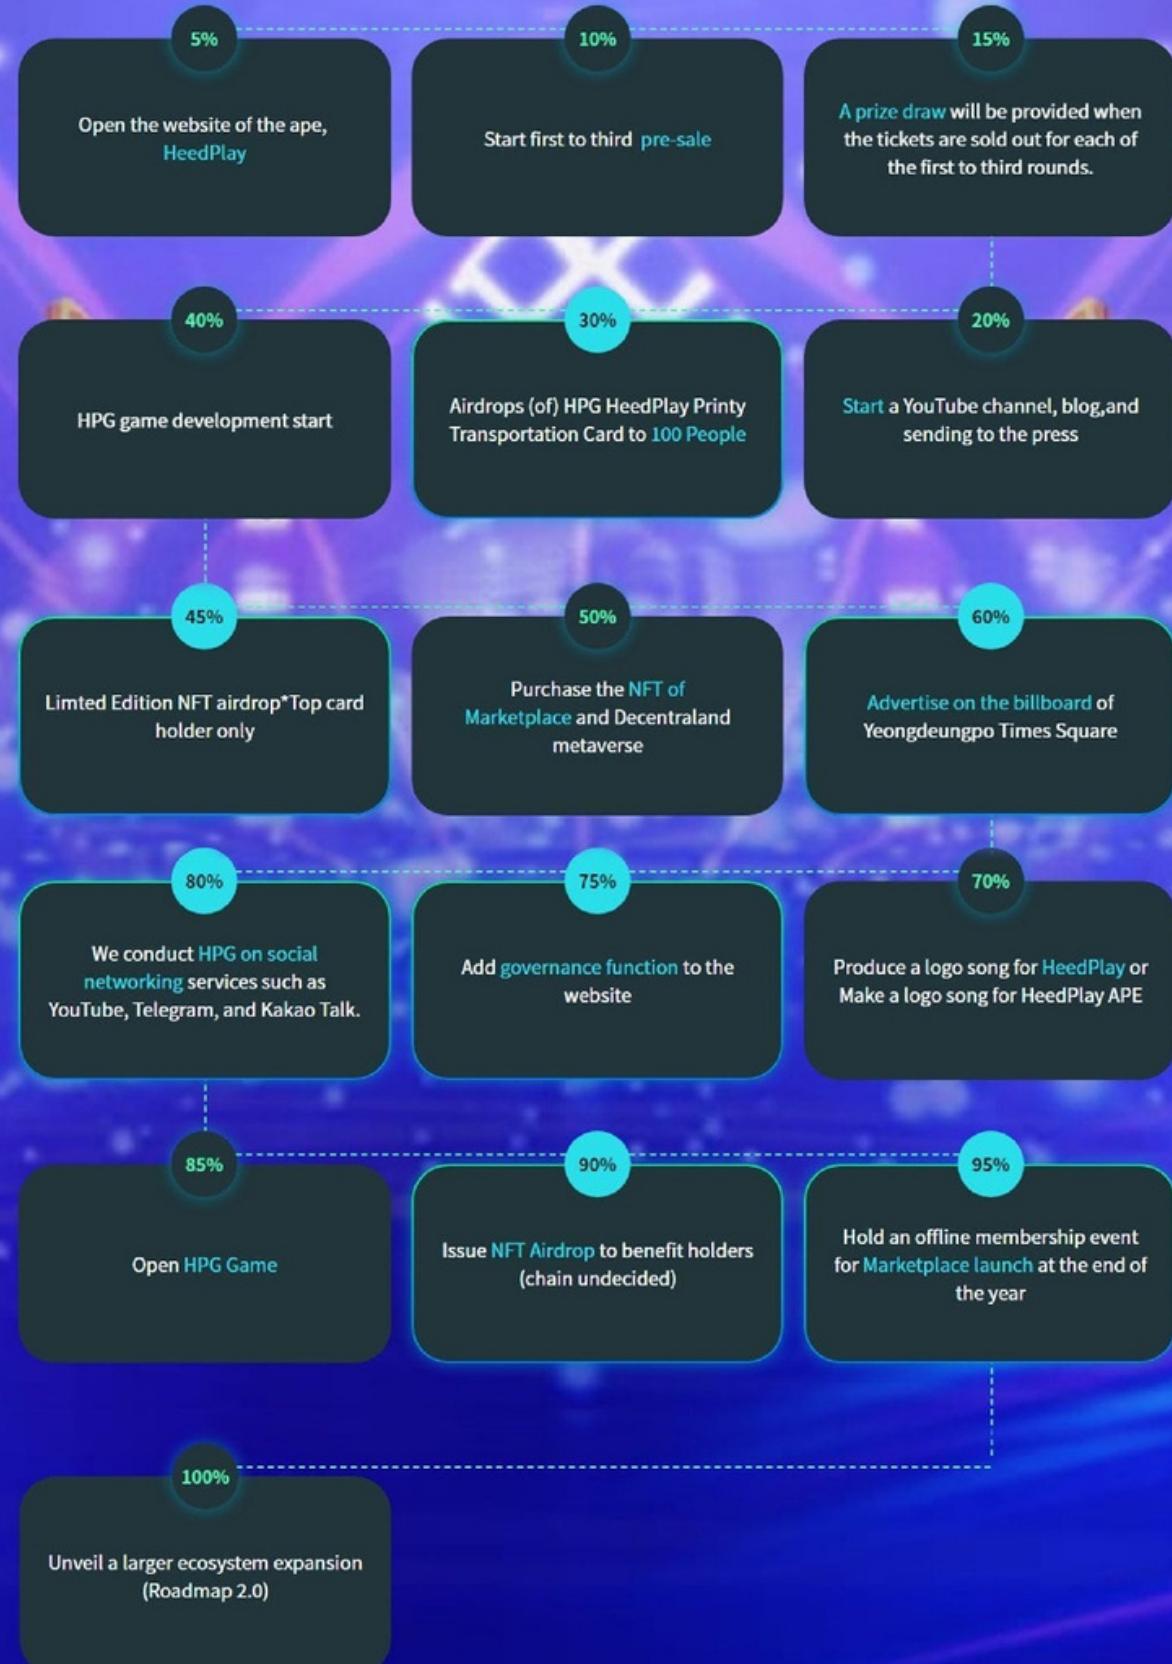

TOKEN ECONOMICS OF THE HEED PLAY SYSTEM

The socialmedia team has scheduled Token sale for a later date which will be announced on the respective channels.
